Advancing Maritime Security Through Data-Driven Analysis

DO MORE WITH DEBRIEF

Deep Blue C provides a range of support options, to help you deliver better quality analysis.

Standard Support Services

Standard support services are designed to enable your analysts to work more effectively. With these services you will get:

● **Responsive user support** so analysts can stay "in the zone".
● **Immediate access to Debrief updates** and new features, delivered in enterprise-friendly format to reduce workload
● **Priority bug fixes and feature requests** with results typically delivered in two working days
● **Training & support** to help you get started & keep working as effectively as possible

Bespoke Development Services

Deep Blue C can also modify Debrief to suit your needs even better. This will let you:

● Use your own **custom symbol libraries** for your platforms & vehicles
● Analyse data in **bespoke file types** directly in Debrief, instead of remaining limited to vendor-supplied basic replay tools
● Directly **exploit simulation** results (both single runs & meta-analysis)
● Get **Improved outputs** through **new data types** (6 degs of freedom, bespoke sensor measurement types), **new analysis concepts**, and direct access to specific **graphical & tabular performance metrics**
